About Me

Motivated software developer with a strong foundation in full-stack development. Proficient in HTML, CSS, JavaScript, React.js, and MongoDB. Experienced in deploying projects on AWS using Lambda, EC2, Nginx, Docker, and SSL verification. Adept at problem-solving and effective communication, seeking to leverage skills in a collaborative, ethically driven company to create impactful solutions.

PROJECTS

“Webform Generation Engine”

- React.js | Route | JSON | [GitHub](#)
- Developed a Webform Generation Engine that dynamically generates webforms using JSON descriptions of form properties.
- Deployed the project on AWS EC2 using production-grade Nginx, PM2, and SSL verification.
- Support extensive customization of webforms and uses MongoDB to maintain a comprehensive record of all submissions.

“Patient Journey Designer”

- React.js | Route | JSON | [GitHub](#)
- Developed a Webapp for Designing Patient journey for provider using visual elements like MiroBoard and Dynamically change the website in production.
- Deployed the project on AWS EC2 with autoscaling using production-grade Nginx, PM2, and SSL verification.

“Study Notion”

- React.js | [GitHub](#)
- Crafted a robust "Study Notion" platform featuring secure login/signup functionality with password accuracy validation, ensuring user data integrity.
- Seamlessly integrated a user-friendly navigation bar for enhanced accessibility, facilitating effortless navigation across the platform's features and resources.
- Dockerized and deployed on AWS using ECR and EC2

“Bubble Game”

- HTML | CSS | Java-Script | [GitHub](#)
- Implemented a captivating bubble game featuring a dynamic scoring system, where players aim to hit bubbles with specific numbers to augment their score.
- Additionally, integrated a timer element to elevate the game's excitement and challenge players' speed and accuracy.

SKILLS

Technical Skills: HTML | CSS | JavaScript | React.js | C++ | AWS

Soft Skills: Communication Skill | Time Management | Problem Solving | Creative Thinking
